

# PETG ext. sheet / clear

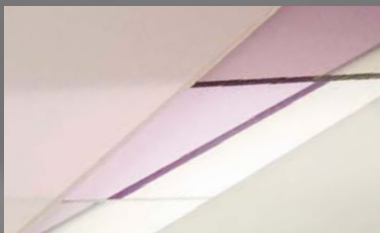

Extruded polyethyleneterephthalate glycol (PETG) has a highly smooth surface with protection to both sides. Stocked in a range of sizes and thicknesses this highly versatile product provides time effective solutions to many applications. PETG is food safe, has good chemical resistance and excellent optical properties (3mm light transmission = 88%). PETG is easily fabricated and vacuum formed whilst offering good all-round thermal resistance especially at low temperatures. Applications extend to machine guards, poster glazing, signs etc.

All products are ex-stock unless in grey, availability on application

# PETG ext. sheet / clear frost

Extruded PETG frost has a matt effect to one surface with protection to both sides. Frost is very easy to thermoform and as with all PETG sheet no pre-drying is necessary. It is also a cost effective solution over polycarbonate. Available on application only, this product is produced in clear as well as a range of colours.
