0.5, 0.8 and 1mm reels on application
 610mm Wide: Standard lengths 1000, 2000, 3000mm
 1000mm Wide: Standard lengths 1000, 2000mm

Extruded acetal co-polymer (POM-C) sheet is stocked in natural and black in a range of sizes and thicknesses. POM is a semi-crystalline thermoplastic and is characterised by a low coefficient of friction, good wear properties and offers resistance to a wide range of chemicals, including many solvents. As water absorption is very low, dimensional accuracy and stability is improved over nylons. POM also provides high mechanical strength, stiffness and heat resistance.
