Cast oil filled nylon 6 (PA 6C + oil) rod is available in green (yellow and black on application), in diameters from 50 to 300mm (up to 710 on application). Oil filled dramatically reduces friction in comparison to standard nylon. Oil filled with its high degree of self-lubrication is particularly suited for sliding parts under high load.

All products are ex-stock unless in grey, availability on application
Standard lengths: 1000, 2000mm

All prices shown accurate at time of production and subject to change without prior notice. Please contact us for further information.
