*All products are ex-stock unless in grey, availability on application*  
Standard lengths: 1000, 2000, 3000mm

Extruded polyethylene terephthalate (PET) sheet is stocked in natural and black in a range of thicknesses. PET is a partly crystalline thermoplastic featuring outstanding dimensional stability, and is virtually unaffected by moisture. A low coefficient of friction, excellent wear resistance combined with low creep and high modulus, make PET the ideal choice for moving parts.
