# PE 1000 anti-static pressed & planed sheet / *black*

PE 1000 anti-static (PE 1000-AST) is a pressed product with a planed surface to both sides. With improved electrical conductivity,  $\leq 10^6$  (standard grades  $\geq 10^{14}$ ) this product has an important use where there are concerns over surface static charge.

As well as offering the detailed press sizes there are a number of other sheet permutations available on a short lead-time, making otherwise uneconomical cut panels affordable.
