

## Product information

---

### Product full identity:

Polypropylene/Polyethylene Regenerated

PPC is light weight (SG 0.91), low water absorption, high impact strength combined with very good chemical properties. PPC has a wide operating temperature range (-20°C to +80°C), easily weldable and food compliant.

## Properties

---

- » Good chemical resistance
- » Good impact strength
- » Low moisture absorption
- » UV protected for years
- » Low cost

## Applications

---

- » Non technical machined parts
- » Divider / liner panels
- » Signage panels

## This document contains

---

- » Technical Datasheet (Page 2)
- » Chemical Datasheet (Page 3)
- » Safety Datasheet (Pages 4-5)

For any further information regarding food, fire and water certificates then please contact the sales team on 0116 232 1010

## Technical Properties

| Physical Properties   | Test        | Unit                              | Result   |
|---|-------------|-----------------------------------|----------|
| 1. Specific gravity   | ISO 1183    | g/cm <sup>3</sup>                 | 0.91-1   |
| 2. Water absorption   | ISO 62      | %                                 | -        |
| 3. Maximum service temp. Upper temp limit<br>(no stronger mechanical stress involved) | -           | °C                                | -        |
| Lower temp limit  | -           | °C                                | -        |
| Mechanical Properties   | Test        | Unit                              | Result   |
| 1. Tensile strength at yield  | ISO 527     | MPa                               | 20-25    |
| 2. Elongation at yield  | ISO 527     | %                                 | 10       |
| 3. Tensile strength at break  | ISO 527     | MPa                               | 10-25    |
| 4. Elongation at break  | ISO 527     | %                                 | 350-700  |
| 5. Impact strength  | ISO 179     | kJ/m <sup>2</sup>                 | -        |
| 6. Notch impact strength  | ISO 179     | kJ/m <sup>2</sup>                 | -        |
| 7. Ball indentation / Rockwell hardness   | ISO 2039-1  | MPa                               | -        |
| 8. Shore-D  | DIN 53505   | -                                 | -        |
| 9. Flexural strength  | ISO 527     | MPa                               | 750-1200 |
| 10. Modulus of elasticity   | ISO 527     | MPa                               | -        |
| Thermal Properties  | Test Method | Unit                              | Result   |
| 1. Vicat-softening point VST/B/50   | ISO 306     | °C                                | -        |
| 2. Heat deflection temperature HDT/B  | ISO 75      | °C                                | -        |
| HDT/A   | -           | °C                                | -        |
| 3. Coefficient of linear thermal expansion  | DIN 53752   | k <sup>-1</sup> *10 <sup>-4</sup> | -        |
| 4. Thermal conductivity at 20 °C  | DIN 52612   | W/(m*K)                           | -        |
| Electrical Properties   | Test Method | Unit                              | Result   |
| 1. Volume resistivity   | VDE 0303    | Ω x m                             | -        |
| 2. Surface resistivity  | -           | Ω                                 | -        |
| 3. Dielectric constant at 1MHz  | -           | -                                 | -        |
| 4. Dielectric loss factor at 1 MHz  | DIN 53483   | -                                 | -        |
| 5. Dielectric strength  | VDE 0303    | kV/mm                             | -        |
| 6. Tracking resistance  | IEC 60112   | -                                 | -        |
| Additional Data   | Test Method | Unit                              | Result   |
| 1. Bondability  | -           | -                                 | -        |
| 2. Food compliance  | FDA         | -                                 | -        |
| 3. Flammability   | UL 94       | -                                 | B2       |

All The above information is for guide purposes only. The data has been taken from standard test results provided by our manufacturers.

## Safety Properties

### Substance / preparation and company detail

Recycled Polypropylene copolymer  
Oadby Plastics  
68 Scudamore Road,  
Braunstone Frith Industrial Estate,  
Leicester,  
LE3 1UA  
0116 232 1010

### Composition / indications to components

Chemical characteristics: copolymer of propylene  
CAS-number: not necessary

### Possible dangers

Unknown

### First-aid measures

General comment: medical aid is not necessary  
First-aid measures: none  
Routes of exposure: none  
Symptoms / effects: none

### First-fighting measures

Suitable fire-fighting appliance: water fog, foam, fire fighting powder, carbon dioxide  
Hazard warning notice: not applicable

### Measures in case of unintended release

Person-related measures: none  
Environmental protection measures: not applicable  
Cleaning equipment: not applicable  
Unsuitable cleaning products: not applicable

### Handing and storage

Handling: no special regulations must be observed  
Storage: unlimited good storage property

### Limitation of exposition

Special design of techn. processing facilities: not required  
Tolerance levels: none  
Exposure measurement procedures: none  
Respiratory protection: not required  
Eye protection: not required  
Body protection: not required

### Physical and chemical characteristics

#### Phenotype

Phenotype / form: semi-finished product, solid state  
Colour: grey  
Smell: not applicable

#### Change of state

Crystalline melting range: 160-164 °C  
Flash point: not applicable

#### Other remarks

Density: 0.91 g/cm<sup>3</sup>

## Safety Properties

### Stability and reactivity

Thermal decomposition: above appr. 300 °C

Dangerous decomposition products:

Besides carbon black also carbon dioxide and water as well as low molecular parts of PP will develop during the burning process. In case of incomplete burning also carbon monoxide may arise.

Use of stabilisers: none

Exothermic reactions: none

Notices regarding state of aggregation: none

Conditions to be avoided: none

Substances/media to be avoided: none

### Toxic information

During several years of usage no effects being harmful for the health were observed.

### Ecological information

No biodegradation, no solubility in water, no effects being harmful to the environment must be expected.

Mobility: not applicable

Accumulation: not applicable

Eco-toxicity: not applicable

### Waste-disposal information

Can be recycled or can be disposed of together with household rubbish (acc. To local regulations).

Waste key for the unused product: EAK-Code 120 105

Waste name: waste of Polyolefine.

### Transport information

No dangerous product in respect to / according to transport regulations

Notice/symbol transport containers: none

Special marking for containers: none

### Regulations

Marking according to GefStoffV/EG: no obligation for marking

Water danger class: class 0 (self classification)

Domestic requirements to be observed: none

### Further information

The information is based on our current knowledge. They are meant to describe our products in respect to safety requirements. They do not represent any guarantee of the described product in the sense of the legal guarantee regulations.
